REPORTING ERRORS AND RECOMMEND

You can help improve this manual. If you find any mistake or if you know please let us know. Mail your letter, DA Form 2028 (Recommended Change) DA Form 2028-2 located in the back of this manual direct to: Commander, Materiel Readiness Command, ATTN: DRSTS-MPSD, 4300 Goodfellow Boulevard, Fort Belvoir, Illinois 62205-5000. Your letter will be furnished directly to you.

operation and performance of organizational, direct and General Support maintenance of Air conditioner, Vertical Compact, 9,000 BTU/HR, 240 volts, 3-phase, 5-/60 Hz.

General

a. Section II - Repairs Parts List. A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with the parts in each group listed in illustration figure and item number sequence. Bulk materials are listed in NSN sequence, as the last group in section 11.

b. Section III - Special Tools List. Not applicable.

c. Section IV - Notional Stock Number and Port of Origin Index. A list, in National Item Identification number (NIIN) sequence of all National Stock Numbers (NSN) appearing in the listings, followed by a list, in alphanumeric sequence, of all part numbers appearing in the listings. National Stock Number and part numbers are cross-referenced to each illustration figure and item number appearance.

Explanation of Columns.

The following provides an explanation of the columns found in the tabular listings.

a. Illustration. This column is divided as follows:

(1) **Figure Number.** Indicates the figure number of the illustration in which the item is shown.

(2) **Item Number.** The number used to identify each item called out in the illustration.

b. Source, Maintenance and Recoverability Codes (SMR).

Uniform SMR Code format as follows:

Code	Definition
PA	Item procured and stocked for anticipated known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that minimum quantity be available in the support systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to support maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide sustained support for the life of the equipment. It is applied to an item peculiar to equipment which, because of the probability of discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.

Item included in both a depot overhaul/repair kit and a maintenance kit.

O Item to be manufactured or fabricated at organizational level.

F Item to be manufactured or fabricated at the direct support maintenance level.

MB Item to be manufactured or fabricated at the general support maintenance level.

MD Item to be manufactured or fabricated at the depot maintenance level.

AO Item to be assembled at organizational level.

AF Item to be assembled at direct support maintenance level.

AH Item to be assembled at general support maintenance level.

AD Item to be assembled at depot maintenance level.

XA Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

XB Item is not procured or stocked. If not available through salvage, requisition.

XD A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA or XD.

(2) **Maintenance Code.** Maintenance codes are assigned to indicate the levels of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in third position will indicate the lowest maintenance level authorized to remove, replace and the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance.

Code	Application/Explanation
------	-------------------------

C	Crew or operator maintenance performed within organizational maintenance.
---	---

O	Support item is removed, replaced, used at the organizational level.
---	--

I	Support item is removed, replaced, used at the direct support element of integrated direct support element of integrated direct support maintenance.
---	--

F	Support item is removed, replaced, used at the direct support level.
---	--

H	Support item is removed, replaced, used at the general support level.
---	---

D	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.
---	--

NOTE

Codes "I" and "F" will be considered the same by direct support units.

(b) The maintenance code entered in fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes.

Code	Application/Explanation
------	-------------------------

O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
---	--

F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
---	--

reparable, condemn and dispose at the
general support level.

- D **Reparable item.** When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.

, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g., shims, spacers, etc.).

4. Special Information.

a. Repair kits and gasket sets appear as the last entries in the repair parts listing for the figure in which its parts are listed as repair parts or are listed at the end of the repair parts listing for the last figure containing parts of the kit.

b. The following publications pertain to the Air Conditioner and its components.

TM 5-4120-339-24 Operator, Organizational,
Direct and General Support
Maintenance Manual.

5. How to Locate Repair Parts.

a. When Notional Stock Number or Port Number is Unknown:

(1) First. Using the table of contents, determine the functional group within which the repair part belongs. This is necessary since illustrations are prepared for functional groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the functional group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

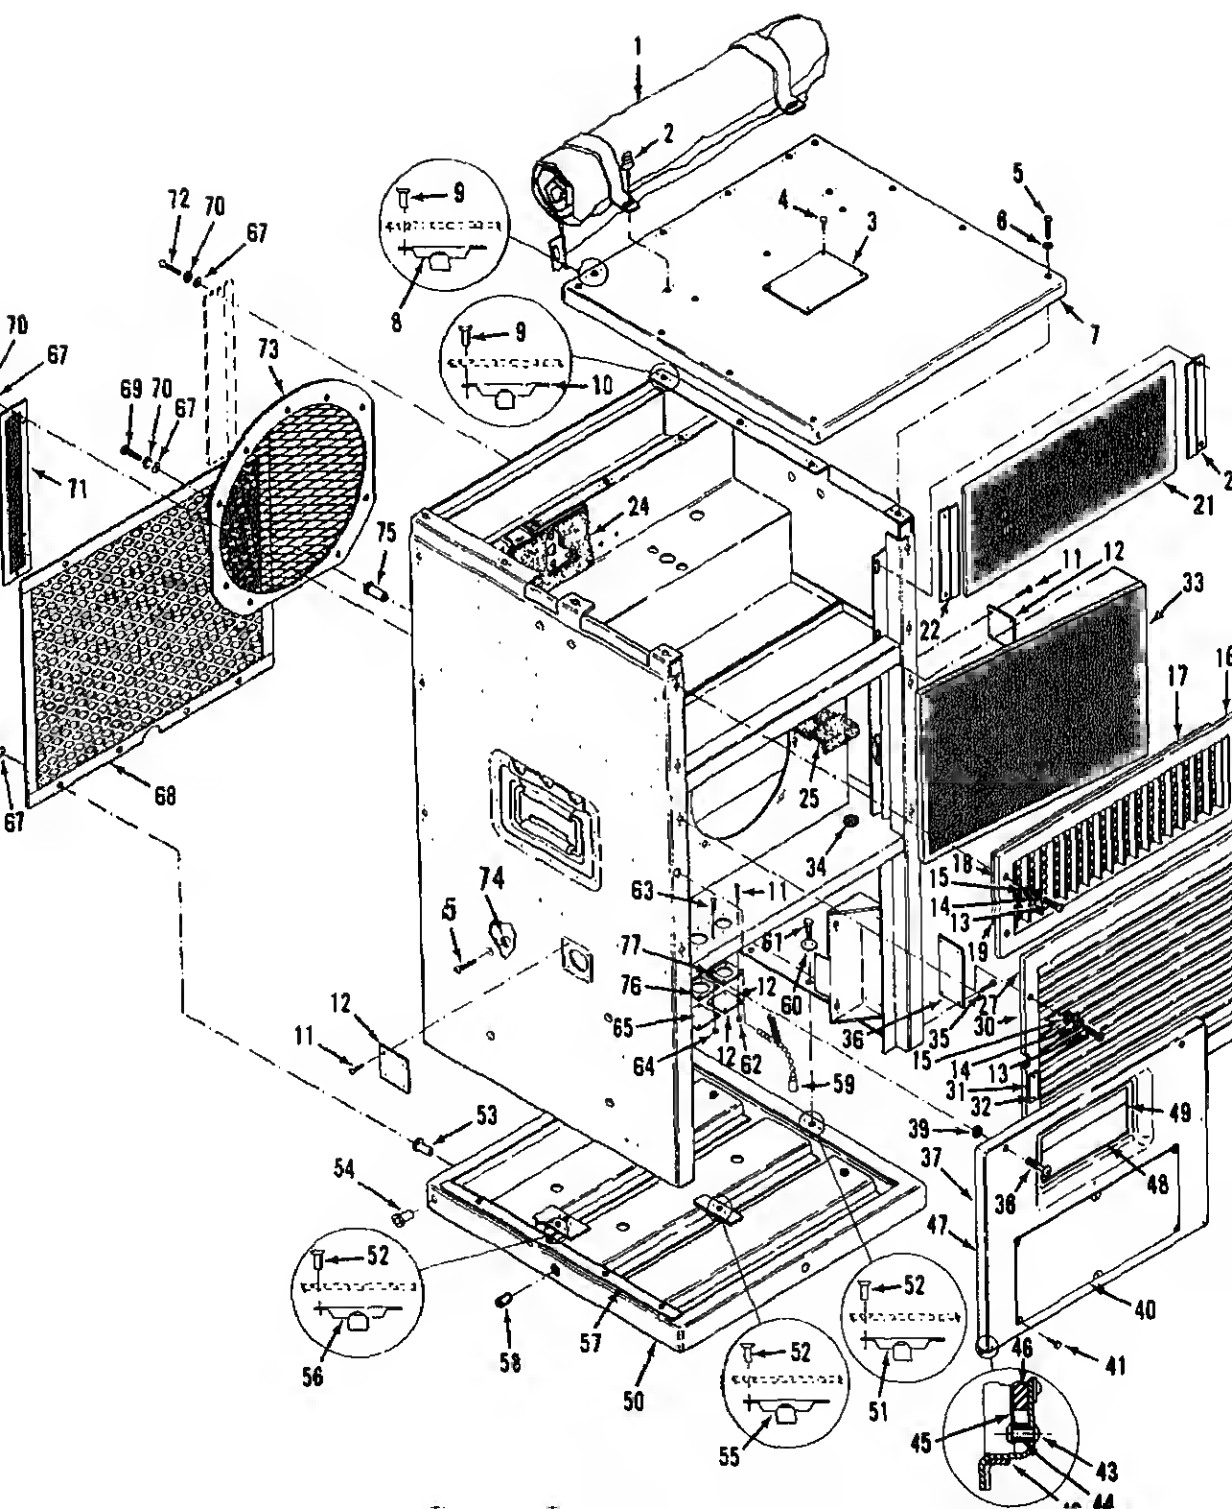

Number is Known.

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in ascending NSN sequence followed by a sequence of part numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) Second. After finding the figure and item number, locate the figure and item number in the repair parts list.

6. Abbreviations:

Abbreviations	Explanation
<i>deg.</i>	<i>degree(s)</i>
<i>eo.</i>	<i>each</i>
<i>ft.</i>	<i>feet (foot)</i>
<i>grp.</i>	<i>group</i>
<i>ld.</i>	<i>inside diameter</i>
<i>in.</i>	<i>inch(es)</i>
<i>lg.</i>	<i>long (length)</i>
<i>mtg.</i>	<i>mounting(s)</i>
<i>No.</i>	<i>Number(s)</i>
<i>od.</i>	<i>outside diameter</i>
<i>u/w</i>	<i>used with</i>

PAGE NO	PARA-GRAPH	FIGURE NO	TABLE NO
---------	------------	-----------	----------

6	2-1 a		
---	----------	--	--

In line 6 of paragraph 2-1a the manual states the engine has 6 Cylinders. The engine on my set only has 4 Cylinders. Change the manual to show 4 Cylinders.

B1		4-3	
----	--	-----	--

Callout 16 on figure 4-3 is pointing at a bolt. In key to figure 4-3, item 16 is called a shim - Please correct one or the other.

125	line 20		
-----	---------	--	--

I ordered a gasket, item 19 on figure B-16 by NSN 2 910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN

centimeter = 10 millimeters = .39 inch
 decimeter = 10 centimeters = 3.94 inches
 meter = 10 decimeters = 39.37 inches
 kilometer = 10 meters = 32.8 feet
 hectometer = 10 dekameters = 328.08 feet
 hectometer = 10 hectometers = 3,280.8 feet

Weights

milligram = 10 milligrams = .16 grain
 centigram = 10 centigrams = 1.64 grains
 gram = 10 decigram = .036 ounce
 dekagram = 10 grams = .35 ounce
 hectogram = 10 dekagrams = 3.52 ounces
 kilogram = 10 hectograms = 2.2 pounds
 kilodal = 100 kilograms = 220.46 pounds
 metric ton = 10 quintals = 1.1 short tons

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.04 gallons
 1 hectoliter = 10 dekaliters = 20.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 ac.
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet
